

Merry
Christmas

Care Instructions

We recommend straightening the wires before changing the pose each night or storing the elf. This is what we like to call the T-position. It is best to position the arms horizontally or straight out away from the body, as shown by the horizontal line in a capital T. Ensure the legs are vertical and in a standing position, as shown by the vertical line in a capital T.

Remove any remaining bend in the wires. Unless the wire is straightened after each pose, repeated bending will cause the wire to snap, coil inside, and become less stable.

T-Position
